THE NEXUS POST

VINYL PANEL

IRON

PICKET

Make The Logical Connection:

- ✓ No Masonry Skills Required
- ✓ Quick and Simple DIY Installation
- ✓ Works for Corner, Ends, or In-Line
- ✓ Integrated Post Supports Decorative Column and Attachment Brackets

The Nexus Post is a **Structural Column System** that combines commercial masonry technology, a two piece metal post, and a universal attachment bracket design, into the most innovative and unique fencing product on the market.

The result is an easily installed, professional grade, decorative fence column, which works with all types of fence applications, delivering unparelled sophistication and value. Patent Pending

- ✓ The brackets can be placed on one side for an end post, or on two sides for In-Line or Corner placement. The posts are available in 4', 5', and 6' heights.
- ✓ The design of the Nexus Bracket, combined with the flexibility in mounting height, allows the Nexus Post to be used in conjunction with most all styles of fence.
- ✓ The two available finishes are Acrylic Stucco in a medium sand finish and Decorative Limestone in a stacked stone design.

SET A POST:

Set the post

Remove top piece to allow easy installation of Decorative Column.

Place Decorative Column over lower post section, Slide upper section into post and secure with attachment rod.

Glue on cap and column is ready to go!

DRILL A HOLE:

Once the post is set, the Nexus Brackets are ready to be installed. The desired attachment height is established and marked, then a 1-1/8 flat blade drill bit is used to make the required holes.

DRIVE A SCREW:

A self drilling and tapping Tek Screw is used in each attachment point to secure the brackets to the Integrated post.

SIZES & COLORS

100% ACRYLIC FINISH (AF) - MEDIUM SAND

Part #	Color	Height	Description
NP4AF9259	Pueblo	48"	**4' Tall** **14" x 14" Column and Cap** **W/Post**
